FlexTech Services Solutions Named Certified FileEngine™ Partner

FlexTech Services Solutions, Inc. has been named a certified partner of FileEngine, a file server appliance that meets four basic needs of small businesses: reliability, file and database sharing, centralized file storage for backups, and security. FileEngine, a product of Indianapolis-based Server Partners LLC, was created for small businesses that need a viable alternative to costly and complex servers.

“FileEngine gives us a new tool to serve a market that we feel is underserved by enterprise technology vendors,” said Brad Garrett of FlexTech. “We are very pleased to be a leader in this area and are certain our customers will benefit from our association with FileEngine.”

FileEngine is built around the Linux operating system, which means there are no per-user license fees. It works well for businesses with up to 50 computers and comes ready to install in the customer's network, greatly reducing the time and cost associated with a server's deployment. FileEngine's predictable \$235 a month cost covers hardware, software, setup, monitoring, and maintenance, making it a worry-free alternative to other complex servers.

“FlexTech was an obvious choice to help us expand in the markets they serve,” said Kim Brand, Managing Partner of Server Partners and inventor of FileEngine. “Due to their commitment to serve the small business customer, and their exceptional engineering staff, we're sure they will be successful.”

Server Partners, LLC was formed in 2001 to develop the technology and business model used with FileEngine, the GNU/Linux-based file server appliance. FileEngine's value proposition is simple: Let us worry about your server. Small businesses have found FileEngine to be an attractive alternative to most complex and costly Microsoft Windows-based servers.

FileEngine is a registered trademark of Kim J. Brand. To learn more about FileEngine, visit www.FileEngine.com or contact Scott McIlwaine, National Reseller Director at (888) LINUX RX. (888-546-8979)
